RE: 2017 Mo-Dad Utilities Rate Increase

Dear Mo-Dad Utilities Customer,

As a result of increasing Department of Environmental Quality regulations and issued Compliance Orders, the Louisiana Public Service Commission granted Mo-Dad Utilities rate relief. These rate increases are a result of Mo-Dad Utilities working with this and other governmental agencies and community members to ensure compliance now and for the future.

Beginning this month, the base sewer rate will increase to \$52.10. This increase will allow Mo-Dad Utilities to borrow the funds to make the required improvements. As capital improvements proceed, the base sewer rate will increase to \$57.10 in April, 2018 and to \$60.10 in April, 2019.

Mo-Dad Utilities has two priorities, customer satisfaction and system-wide compliance. We want you to see and feel the positive effects of this rate increase as soon as possible. Our construction schedule anticipates a completion of all improvements over a three-year period. As we approach the work scheduled in your area, we will notify you of the improvements you can expect to receive.

Thank you for the opportunity to serve you and our community. Additional information can be found on our website www.mduonline.com under the 2017 Rate Increase tab.

Sincerely,
Management Team
Mo-Dad Utilities
